

iSpeed for Reany bikes

installation manual

STEALTH INSTALL (INSIDE THE HANDLEBAR)

WARNING: Make sure your e-bike is turned off !

1. Loosen the large hex bolt under the headlight to remove the display
2. Push the hex bolt up and remove the display
3. Place the display to the side and disconnect the connector going from the bike frame to the display and connect the iSpeed module
4. Insert the iSpeed module inside the handlebar to the right

5. Gently push the iSpeed connector cables inside the handlebar to the left
6. Also push the connector for the control buttons back inside the handlebar
7. If all the cables are out of the way you can re-install the display, make sure it fits without force, if not check the cables
8. Don't over tighten the hex bolt as this may damage your display
